Re: Submission to include KIM SAR E35/60L/4K to the National Electricity Market Load Table

Dear Mr. Ripper,

International Lighting request to have the following luminaire included in the National Electricity Market Load Table for Unmetered Loads.

- KIM SAR E35/60L/4K 65.67W
- Tested with LED modules and LED driver only, excluding any other control device such as a PE Cell. Luminaire will be controlled via a remote mounted PE Cell connected to unmetered load supply.
- TS 1158.6 compliant markings:
Luminaire is of a type whereby aesthetic considerations are a function of the usage factor. A Label with the required information will be provided with the luminaire for location by others (section 1.6). This will be in addition to the required internal labels and necessary installation instructions.
- Supporting documentation previously submitted:
 - City of Gold Coast Council supporting letter, requesting the inclusion of the luminaire to be listed on the NEM load table
 - Nata Test Report 180814BLCP
 - Luminaire Data Sheet

We would appreciate your assistance for the inclusion onto the AEMO Load Table

Should you have any queries, please do not hesitate to contact me.

Kind Regards,

Robert Woodward
